

CATARACTS XPLAINED

QUESTIONS FOR YOUR EYE CARE PROFESSIONAL

Thanks for visiting cataractsxplained.com.au. We hope it's cleared up some of the mystery around cataracts. If you are now planning to visit an eye care professional to discuss your options, here's some pointers on questions to help you fully understand the solutions available to you:

Will I go blind from cataracts?

Will glasses or contact lenses fix my cataracts or is surgery my only option?

When will I need to have my cataracts treated?

Which type of intraocular lens do you think will best suit my lifestyle and activities?

I've heard some people don't need to wear glasses or contacts anymore after having their cataracts removed – is this an option for me?

What should I know about the cataract surgery procedure, including any risks and potential adverse effects?
